

07 AI Action-Item and Accountability Engine

Work arrives from meetings, email and chat with no owner attached. This assigns it before it disappears.

01 Watch every inflow

Tasks arriving from meetings, email, chat and tickets

02 Detect the gaps

Items with no owner, no date, or both

03 Infer the owner

Based on role, project membership, current load and past similar work

04 Assign and date

Owner set, realistic due date derived from task type and workload

05 Handle the match

Confidence determines what happens next

Clear owner	→	Assigned and notified
Ambiguous	→	Asks before assigning
Owner overloaded	→	Suggests an alternative
No match	→	Routed to the team lead

06 Confirm with the owner

Accept or reassign in one click

07 Escalate if ignored

Unacknowledged after 24 hours goes to the manager

An owner can always decline. Nothing is forced onto anyone.

PRIMARY PAYOFF Nothing lands in the gap between people.
