

09 Waiting-on-Reply Tracker

Half of what stalls is waiting on someone else's reply, and the person who asked is the one carrying it in their head.

01 Watch outbound messages

Email and chat where you asked for something

02 Identify the ask

Distinguishes a genuine request from a statement or a courtesy

03 Set the expectation

Reasonable response window inferred from recipient, relationship and urgency

04 Track for a reply

Marked resolved automatically when a response arrives

05 Handle the silence

What happens when the window passes

Replied	→	Closed silently
Overdue internal	→	Colleague nudged directly
Overdue external	→	Follow-up drafted for you
No reply needed	→	Dropped from tracking

06 Draft the follow-up

Written in your voice, waiting for one click

Follow-ups are drafted for you, never sent automatically.

PRIMARY PAYOFF You stop being the memory for other people's replies.
