

# 10 AI CRM Autopilot

A CRM is only as good as the discipline behind it, and discipline is the first thing to go in a busy quarter. This keeps it current without typing.

01 Watch the conversations

Email threads, meeting transcripts and calendar events with known contacts

02 Extract the signals

Stage changes, next steps, blockers, competitor mentions, budget and timeline

03 Match to a record

Resolved to the right contact, company and open deal

04 Assess confidence

Determines whether it writes or asks

- Confident** → Written to the record
- Conflicting signal** → Flagged for review
- New contact** → Record created
- No match** → Held for manual matching

05 Update the record

Fields, notes, next action and close date written back

06 Flag what looks wrong

Contradictions and stalled deals surfaced for human review

Every field change shows the message it came from.

PRIMARY PAYOFF    The CRM reflects reality without anyone maintaining it.
