

11 AI Marketing Content Engine

Consistent presence is a full-time job that most companies this size cannot justify hiring for. This produces the drafts and waits for approval.

01 Gather the raw material

Company positioning, recent wins, customer language, industry movement

02 Generate angles

A short list of specific ideas, not generic topics

03 Draft per platform

Copy written to the format and tone of each channel

04 Check against the brand

Tone, claims made, and prohibited language

05 Sort the drafts

Only clean drafts reach the queue

On brand	→	Queued for approval
Claim needs evidence	→	Flagged with the claim marked
Off positioning	→	Discarded
Time sensitive	→	Moved to the front of the queue

06 Queue for approval

Nothing publishes until a human releases it

07 Feed results back

Engagement data shapes the next round of angles

Nothing publishes without a human approving the queue.

PRIMARY PAYOFF Consistent presence without a content hire.
