

12 AI Customer-Service Front Line

Most inbound questions have been answered a hundred times before. This handles those and gets the rest to a person quickly.

01 Receive the enquiry

Web chat, email or phone, twenty-four hours a day

02 Identify the customer

Account, order history and open issues pulled automatically

03 Understand the intent

What is actually being asked, separated from how it was phrased

04 Decide how to handle it

Resolution path chosen per enquiry

Answerable	→	Resolved immediately
Needs account action	→	Executed after confirmation
Out of scope	→	Escalated with full context
Asks for a human	→	Transferred without argument

05 Answer with context

Knowledge base response, personalised with the customer's own account detail

06 Hand off cleanly

Escalations arrive with the full transcript and context attached

07 Log the outcome

Transcript and resolution written to the CRM

Escalates the moment a customer asks for a person.

PRIMARY PAYOFF Routine questions stop reaching the team.
