

16 AI Renewal and Contract Watchdog

Contracts renew silently on dates nobody is tracking. The cost is invisible until someone audits the card statement.

01 Ingest the agreements

Contracts, invoices and subscription receipts

02 Extract the terms

Renewal date, notice period, auto-renewal clause, annual cost and internal owner

03 Monitor actual usage

Seats, logins and activity where the system can be connected

04 Recommend by usage

What to do is driven by evidence, not habit

- Actively used → Renew, with usage noted
- Underused → Downgrade proposed with seat count
- Unused → Cancellation flagged
- Price increase → Negotiation brief prepared

05 Alert before the deadline

Timed to the notice window, not the renewal date

06 Prepare the case

Usage evidence assembled for the renegotiation conversation

Alerts before the notice window closes, not after.

PRIMARY PAYOFF You stop paying for things nobody uses.
