

17 AI Financial Close and Bookkeeping Assistant

The monthly close is mostly matching and categorising, done by hand, late. This does the mechanical part and hands over the exceptions.

01 Ingest the sources

Bank feeds, card transactions, invoices and receipts

02 Match the records

Transactions reconciled against invoices and receipts

03 Categorise consistently

Coded to the chart of accounts, learning from prior treatment

04 Handle each match

Confidence determines whether a human is needed

- Confident match → Coded automatically
- Partial match → Suggested for confirmation
- No match → Exception queue
- Anomaly → Flagged with the reason

05 Flag the anomalies

Duplicates, unusual amounts and unrecognised vendors surfaced

06 Prepare the close

Checklist assembled with every exception listed and explained

07 Hand to the bookkeeper

Reviewed and posted by a person

Prepares the close. A person posts it.

PRIMARY PAYOFF Close goes from days to hours.
