

18 AI Weekly Report Generator

Weekly reporting is assembled by hand and arrives too late to act on. This produces it overnight and explains what moved.

01 Trigger

End of the working week, automatically

02 Pull from every system

CRM, finance, project and support tools

03 Compare against targets

Current period measured against plan and prior period

04 Explain the movement

Variance traced to the underlying events that caused it

05 Classify each measure

Attention directed where it is needed

- On target → Noted briefly
- Off target → Variance explained with cause
- Data missing → Gap named explicitly
- Unusual movement → Highlighted for review

06 Compose one page

KPIs, variance, leakage and what needs attention

07 Deliver Monday morning

In the inbox before the week starts

Every number links back to the system it came from.

PRIMARY PAYOFF Reporting stops being assembled by hand.
